FormatX

Media Conversion & Compression App

By Abhishek Chaurasiya

Overview

• FormatX is a Flutter-based mobile app for converting and compressing media files using FFmpeg. It supports audio, video, and image formats and includes Firebase authentication.

Select a File

Detected Type: IMAGE

Available Operations:

- O Convert Format
- O Compress Image
- Resize Image
- O Convert to PDF
- O Create GIF from Images
- Change DPI

Profile

Key Features

Automatic detection of audio, video, and image file types.

Media compression

Reduce the size of video, audio, and image files.

Firebase Authentication

User authentication and profile management using Firebase.

Format conversion

Convert between formats (e.g., MP4 to MP3, AAC).

PDF conversion

Convert images to PDF documents.

Scalable operation mapper

Organized by operation mapper for scalability.

App Architecture

- Flutter Frontend: Utilizes multiple screens for a user-friendly interface.
- Firebase Integration: Employs Firebase for authentication and cloud storage solutions.
- FFmpeg Execution: Executes FFmpeg commands through the `flutter_ffmpeg_utils` package.
- **Modular Operation Mapping:** Implements organized operation mapping via `operation_mapper.dart` for enhanced scalability and maintainability.

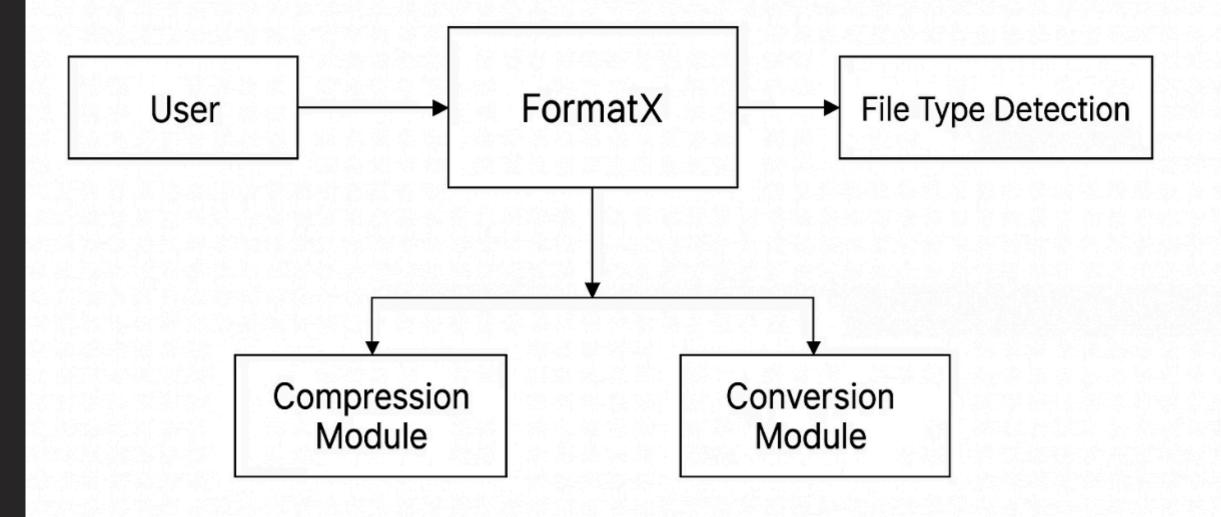

Screen Flow

- 1. HomeScreen: File selection & operation picking
- 2. ConversionScreen: Format-based conversion UI
- 3. CompressionScreen: Compression level setting
- 4. SavedScreen: Placeholder for saved file access
- 5. ProfileScreen: User profile & photo update

Technologies Used

- - Flutter
- - Dart
- - Firebase Auth, Firestore, Storage
- FFmpeg (via flutter_ffmpeg_utils)
- - Path & File Picker libraries
- - Permission handling

SYSTEM ARCHITECTURE

Firebase Integration

- - FirebaseAuth: Email & Google login
- - Firebase Storage: Profile photo upload
- - FirebaseUI: Auth screens and widgets

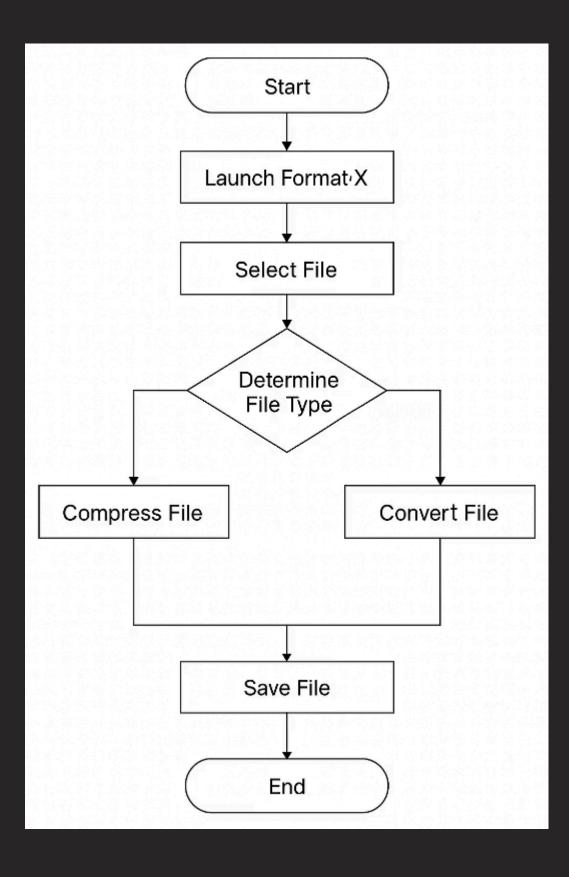

Future

- Add batch processing for files
- - Include more FFmpeg features (e.g., trim, gif creation)
- - Save & view file history
- - UI/UX improvements & animations
- - Web and desktop versions
